Ogunsola Faruk

Software Developer - Web & Mobile

ogunsolafark8@gmail.com | ogunsolafaruk.vercel.app | github.com/Fatzy070

PROFILE

Software developer building complete products across web and mobile, from React and React Native interfaces to backend APIs, authentication, payments, AI integrations, document processing and production deployment.

EXPERIENCE

Full-Stack Developer | Naelix Tech Group of Companies

January 2026 - Present

Contributing to production applications across team collaboration, fintech, developer infrastructure and identity verification.

- Build end-to-end features across React frontends and Node.js services, including APIs, authentication and real-time functionality.

- Work with the engineering team on third-party integrations, production issues and application reliability.

Backend Developer | Xerv

August 2025 - November 2025

Built backend services for NeTuArk, a social networking platform with account, social and messaging workflows.

- Implemented REST APIs, authentication, authorization and real-time communication in collaboration with frontend developers.

- Designed database models and queries using Prisma and MySQL; integrated Firebase services where required.

Web Developer Intern | SPTech

June 2025 - August 2025

Supported students during web development training through mentoring and practical learning resources.

- Helped learners understand programming fundamentals and prepared visual materials to explain technical concepts.

SELECTED PRODUCTS

Parvis | Learning platform

A deployed learning platform connecting structured courses, AI-assisted study, subscriptions and verifiable certificates. Built across the learner experience, backend services and administrative tools.

https://parvis.com.ng

Papertrail | Document workspace

A browser-based PDF editor with selectable text, movable elements, multi-page editing and export. A document engine supported by authenticated storage, version history and a dedicated backend.

https://papertrail.parvis.com.ng

Nexus | Web and React Native

Social product with a Next.js web application and an Expo / React Native mobile app. Mobile implementation includes native navigation, secure token storage, chat, voice recording and push-notification handling.
