OGUNSOLA FARUK

Software Developer | Web & Mobile

Lagos, Nigeria • +2348088429227 • ogunsolafaruk8@gmail.com
GitHub • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Software Developer building production applications across web and mobile, with experience working from user-facing interfaces through backend systems, APIs, integrations, databases, and deployment.

Primarily working with **React, React Native, TypeScript, Next.js, Node.js, and NestJS**, with hands-on experience in authentication, real-time systems, payment integrations, AI-assisted features, file and document processing, and cloud infrastructure.

Comfortable owning features end to end from interface design and application logic to backend services, third-party integrations, and production delivery with a focus on maintainable architecture, performance, and practical user experience.

PROFESSIONAL EXPERIENCE

Naelix Tech Group — Full Stack Developer
February 2026 – Present | Remote, Nigeria

- Built and shipped features across **NTeam**, an internal CEO and staff operations platform, working across Next.js frontend and NestJS backend systems.
- Implemented role-based access, attendance workflows, reports, project tracking, meetings, payroll interfaces, notifications, and other operational workflows.
- Worked across frontend/backend integration, API contracts, authentication, application state, real-time events, and production issue resolution.
- Contributed to products including **NVerify** and **Givvo**, working on KYC/document-upload flows, API tooling, wallet and payment integrations, and deployment-related fixes.
- Built reusable, responsive TypeScript interfaces and data-driven components across multiple production product surfaces.

Xerv — Full Stack Developer
August 2025 – January 2026 | Remote, Nigeria

- Built **NeTuArk Social**, a real-time social messaging platform with persistent conversations, authenticated user sessions, and interactive social features.
- Integrated REST and GraphQL APIs across frontend workflows using **TanStack Query**, including caching, optimistic updates, and asynchronous state handling.
- Implemented JWT-based authentication and worked across frontend/backend integration for secure application workflows.
- Built responsive interfaces in collaboration with design and engineering teams, with attention to usability across desktop and mobile.
- Supported application deployment and release workflows using GitHub, Render, and Netlify.

Code Alpha — Software Development Intern
June 2025 – September 2025 | Remote

- Built JavaScript applications including a weather application using third-party APIs and dynamic DOM rendering, alongside an age calculator focused on event handling, input validation, and core browser development fundamentals.

SELECTED ENGINEERING PROJECTS

Parvis — Learning Platform
Live: parvis.com.ng
GitHub: github.com/Fatzy070/learn-front

Production learning platform built around structured course delivery and AI-assisted learning.

- Built functionality spanning course discovery, enrollment, lesson delivery, progress tracking, and account management.
- Implemented AI-assisted lesson summaries and quiz generation, including shared generation/caching workflows and usage management.
- Integrated subscription and one-time payment flows, certificate generation, study reminders, notifications, support workflows, and administrative tooling.
- Worked across frontend, backend, persistence, authentication, third-party integrations, and production deployment infrastructure.

Papertrail — Browser-Based PDF Editor
Live: papertrail.parvis.com.ng
GitHub: github.com/Fatzy070/papertrail-website

Browser-based document editing platform designed for manipulating and exporting PDFs directly from the web.

- Built PDF rendering and editing workflows for text replacement, text and image overlays, document element manipulation, and export.
- Implemented centralized PDF coordinate transformation to keep document edits consistent across zoom levels and viewport sizes.
- Added OCR-assisted workflows for scanned or image-based documents alongside document management and versioning architecture.
- Worked with **React, TypeScript, PDF.js, pdf-lib, Zustand, TanStack Query, Tesseract.js, NestJS, MongoDB, and cloud object storage**.

Nexus — Social Media Application
Live: nexus-tau-taupe.vercel.app

Full-stack social application spanning web and mobile.

- Built user accounts, profiles, content creation, media workflows, and connected social experiences.
- Implemented real-time communication, push notifications, secure authentication, privacy controls, and client-side caching.
- Extended the product into mobile development using **React Native**, alongside the existing web and backend architecture.

TECHNICAL SKILLS

Frontend & Mobile:
React • React Native • Next.js • TypeScript • JavaScript • Tailwind CSS • TanStack Query • Responsive UI Development

Backend & APIs:
Node.js • NestJS • Express • REST APIs • GraphQL • WebSockets • Socket.IO • JWT Authentication • Webhooks

Databases & Storage:
MongoDB • Mongoose • PostgreSQL • Prisma ORM • Redis • Supabase • Cloudinary • Cloud Object Storage

Product Engineering:
Authentication & Authorization • Payment Integrations • Real-Time Systems • AI Integrations • File Processing • PDF/Document Processing • Third-Party APIs

Tools & Deployment:
Git • GitHub • Postman • Vercel • DigitalOcean • Render • Railway • GitHub Actions • CI/CD

EDUCATION

Diploma — Full Stack Development
SP Tech Academy
January 2025 – October 2025

Training covering Data Structures & Algorithms, Full Stack Web Development, System Administration, and Project Management
